

The award-winning, **primary digital Tool Suite** that enhances your curriculum, no matter what subject you're teaching.

## WINNER

# Create, share, and learn

At Just2easy, we are passionate about bringing the best technology into education in a way that is powerful yet easy to use. Our digital tools, apps and learning resources are fully cross-curricular, and include a range of accessibility features such as our speech to text function. The tools can be accessed any time, anywhere. Included in the Just2easy Tool Suite are:

## Tools to encourage children’s creativity

At the heart of Just2easy is a set of engaging, cross-curricular tools that help pupils unlock, and safely share, their creativity in the classroom and at home. Use the Just2easy Tool Suite for:

- Writing
- Painting and drawing
- Animation, video and audio
- Coding
- Data handling
- Game-based learning for practising spelling and times tables

and much more...

## Tools to support teachers

We are passionate about making teachers’ lives easier, and have a range of tools to support them.

- Find an ever-growing number of engaging resources in our library; designed by teachers, for teachers
- Set and monitor homework digitally
- Turn PDF files into interactive documents
- Differentiate for learners using accessibility features

## Tools to promote parental engagement

Our Parent portal, and associated tools, allow for effortless transparency and communication between schools and parents/carers.

Parents can:

- View children’s completed work, and any homework set
- Communicate directly with teachers (at the school’s discretion)
- Receive notifications about pupils’ reward points

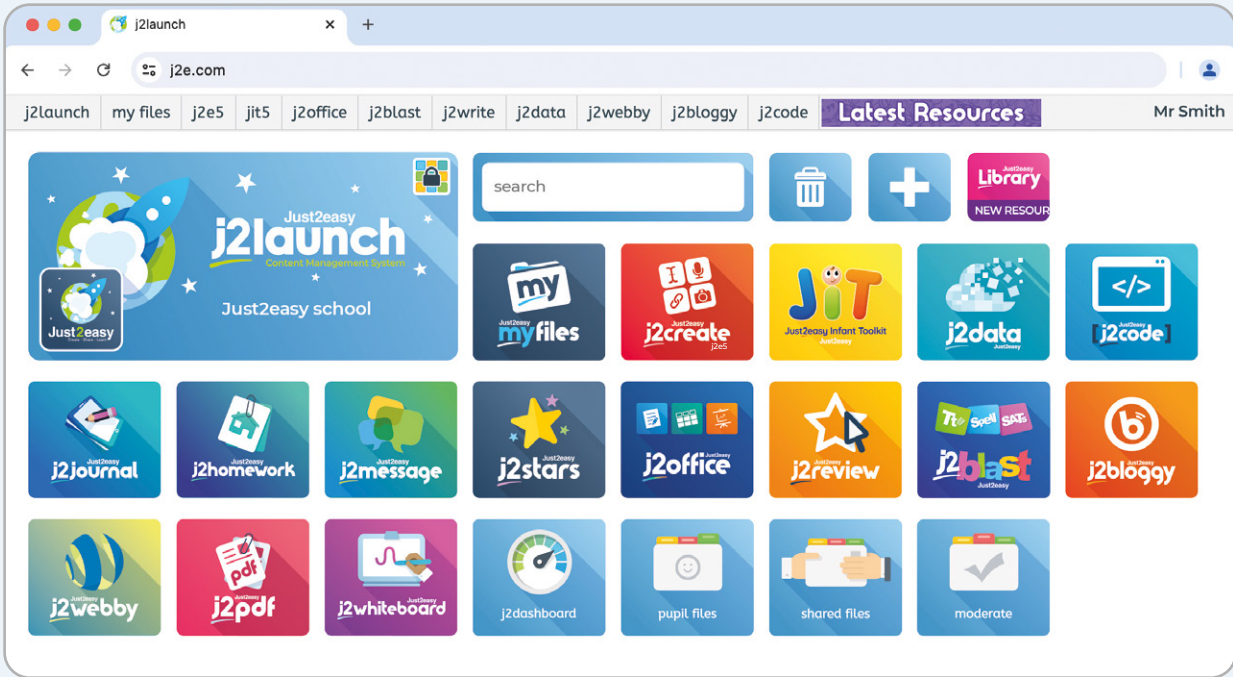

# The possibilities are limitless

“ Children of all ages take to it like ducks to water using it intuitively from the very start. We can start a new cohort of children off with a five-minute introduction and leave them to fly from that point onwards. ”

Mike Prince, Headteacher, Staveley CE Primary School

“ Having invested in the Just2easy Tool Suite for use across the Primary age range for over a decade, we know we have a comprehensive selection of innovative online tools that can be used in a wide variety of contexts to suit many different aspects of the curriculum for over 3,000 of our schools connected to LGfL. ”

# The platform

## Access to your school's own virtual desktop anywhere

At the centre of Just2easy is j2launch, or the 'launch pad'. This innovative interface has tiles which link to every tool and area of Just2easy that a teacher or student might need to access. It is also fully customisable to meet the needs of your students.

## A safe and secure place to learn and share

E-safety is at the heart of everything that we do at Just2easy; and it's just a part of the reason we are trusted by governments and schools across the UK and worldwide. The Just2easy Tool Suite is fully GDPR compliant, with all data being processed and stored within the EU.

## Unlimited e-safe access and shareability

Just2easy is built on a cloud based storage system with unlimited capacity. This means that teachers and children can upload and create as many files as they like. All files created by a user are stored in their 'my files' areas. Files can be easily saved, accessed, and shared. Teachers have a full view of the files of every student in their school. They can view, edit, share, and print files.

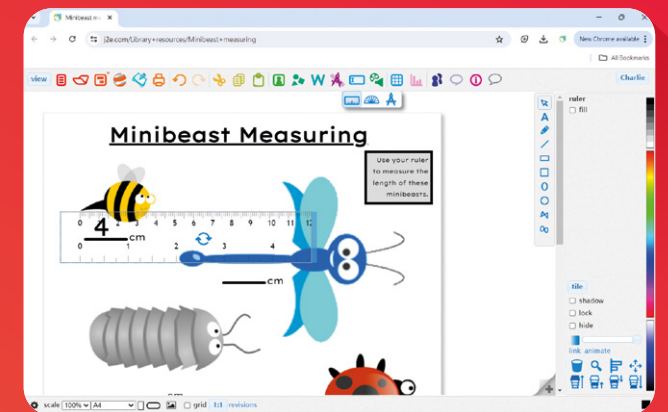

Watch a video

# Write, draw, animate and more in one space

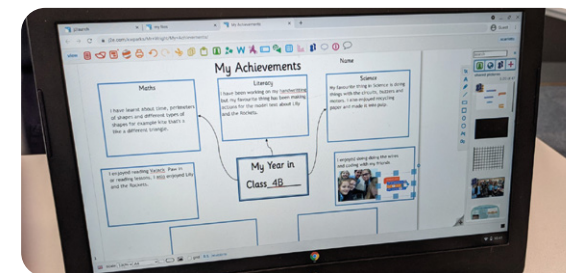

## Transforming the way pupils create and present classroom and homework projects.

J2create is a digital blank piece of paper; an amazingly versatile tool that can be used across the curriculum. Users can add text, images, videos, graphs, audio, annotations, and even animations to create anything from web pages, blogs, posters, portfolios, and more. There is even a set of dynamic measurement tools built in. The cross-curricular possibilities are endless.

## Accessibility tools

J2create has a number of accessibility features, including word banks to aid literacy development, speech to text, and text to speech tools, all of which work in multiple languages. These have been specifically designed to support children with visual impairment, any learning differences, or English as an Additional Language. With j2create, every child can succeed.

**P Wright**

@WrightICT - 30 Jun

Y4 @KingswoodParksP have been using #J2E5 to record their reflections of the past year. Neat use of a QR code by some too. Thanks to @ICTmagic for the original idea.

**Tool Suite**

## Creative tools for beginner learners

The Just2easy Infant Toolkit (JIT) is a set of online educational tools specifically designed for younger learners or those who need a little more support. It has a colourful and friendly feel which appeals to early years and KS1, although tools such as Chart are useful well into KS2.

See more

# The Just2easy Infant Toolkit

## Chart

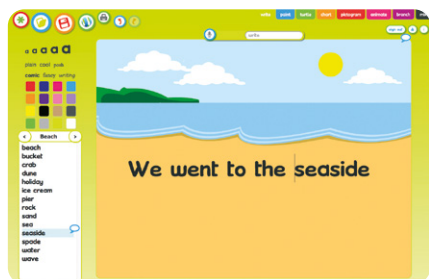

Chart gives the simplest introduction to line, block, pie, and bar charts. Simply add information to the table and see the chosen chart/s update instantly.

## Pictogram

A fun introduction to data handling. Pick from a range of topics, such as colours, pets or favourite fruits, then click the buttons to add or take away the relevant pictures. Draw your own pictures or select from the picture bank.

## Write

A simple-to-use writing tool, suitable for beginner writers. A choice of word banks plus speech to text and text to speech functions are available for support. Children will enjoy experimenting with presentation and style. Coloured backgrounds can be chosen to aid learning.

## Paint

Paint is an easy-to-use creative tool. Children can paint freely with different sizes and colours. Shapes and stamps are easily selected, as well as colourful template backgrounds, and pictures from a picture bank.

## Turtle

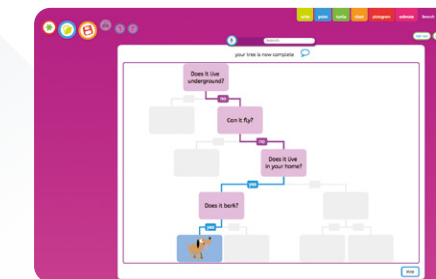

Turtle teaches children the initial concepts of direction and simple programming. Children can design their own 'turtle' and plan a route for it to follow. Fantastic nursery rhyme and adventure templates are included.

## Animate

Animate is a tool for creating simple but exciting animations. It is a natural progression for children to draw a picture in Paint, then use Animate to make part of it move. Make snowflakes fall, crabs scuttle, and cars race.

## Branch

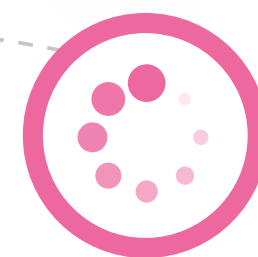

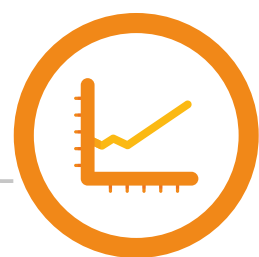

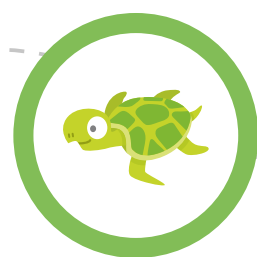

Branch brings sorting and sequencing to life by making it very simple for pupils to create their own branching database. Select a group of images or words and use yes/no questions to sort them and create a branching database.

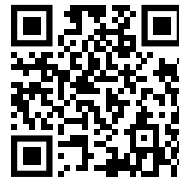

## Mix infant e-portfolio

Blend together any of the other tools into a mini e-portfolio. For example, add a picture to some text on one page, then move on to an animated story on the next.

# Turning data into more than a bar chart

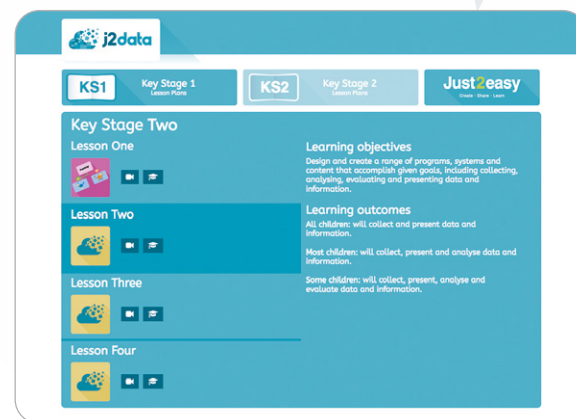

## Organise and present data your way

Whether you're introducing an early years class to data with pictogram or analysing a database with a Key Stage 2 class, j2data has an appropriate tool for every age.

J2data meets all of the data handling elements of the National Curriculum computing programmes of study, for both KS1 and KS2.

It's more than just a tool; j2data also includes detailed lesson plans, examples, and videos, all mapped to the curriculum to help you get started. The lesson plans can be easily modified around any topic your class is currently working on, making the data more meaningful to pupils.

## Utilise data across your curriculum

English	Maths	Science	Computing	History	Geography	Art & Design	D & T	Languages	Music	Cross Curricular
	✓	✓	✓	✓	✓					✓

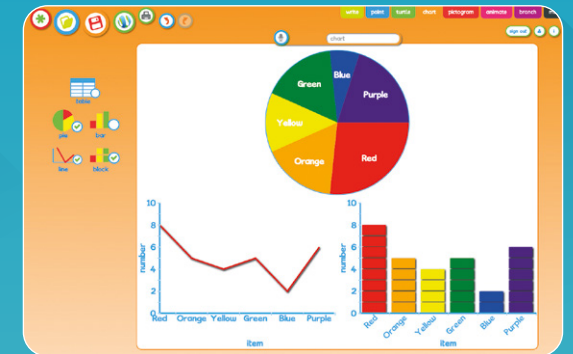

### Pictogram

A fun introduction to data handling. Pick from a range of topics, such as colours, pets or favourite fruits, then click the buttons to add or take away the relevant pictures. Draw your own pictures or select from the picture bank.

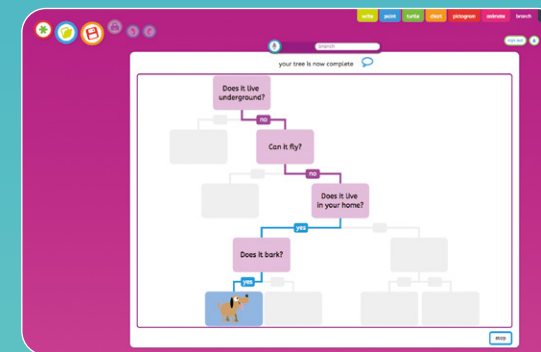

### Chart

Chart gives the simplest introduction to line, block, pie, and bar charts. Simply add information to the table and see the chosen chart/s update instantly.

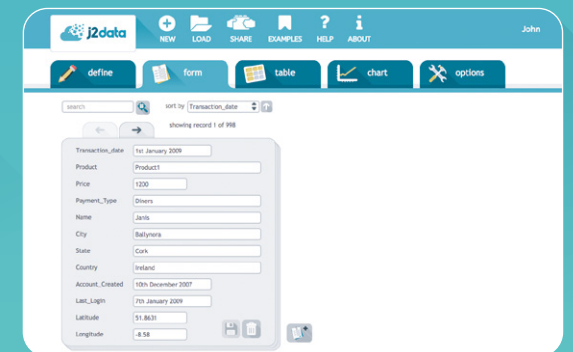

### Branch

Branch brings sorting and sequencing to life by making it very simple for pupils to create their own branching database. Select a group of images or words and use yes/no questions to sort them and create a branching database. Once created, the database may be "played". You will then be asked a series of yes/no questions. At the end of the sequence, the image that matches all of the answers is displayed.

### Database

Database is an exciting online database program, but with the power of a commercial database. It enables pupils to easily create online databases that have real purpose. It is multi-user and information is shared in an e-safe environment. It encourages students to understand the relationships between the information being gathered and present it in a variety of ways, including tables and charts. Database can handle rich media such as video, sound, or graphics.

# Learn and create custom programs

## JIT turtle

JIT turtle is aimed at the youngest learners and starts to introduce all of the important concepts of programming. Pupils begin by simply clicking an on-screen turtle or sprite to move it, turn it or put a pen up or down. As well as moving the sprite, it builds up a simple program as a series of commands in a separate window. As a user becomes more confident they can move to advanced mode where the turtle does not perform the actions until the program is run. This is a perfect compliment to motorised floor turtles.

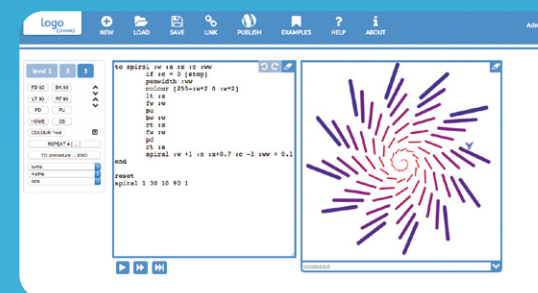

## Visual

The Visual programming engine is a familiar, block-based programming tool which works on any modern computer or tablet. Starting with the simplest of programs, pupils can progress to a high level of sophistication which will keep them engaged and motivated. Teachers can share scripts with the class, easily creating differentiated learning activities. There are 3 differentiated levels which enable pupils to work independently without unnecessary clutter or distraction of script that they do not understand or need.

## Logo

The Logo programming engine enables pupils to build varied and mathematically challenging scripts. The differentiated levels allow pupils to continue on from JIT turtle, applying what they have learnt to a new context. Level 3 encourages users to work independently or for teachers or pupils to create examples for sharing with the class.

## Free resources

As part of j2code, users have access to a range of resources and lesson plans including Hive Hackers, a set of in depth lesson plans, which have been designed to give teachers step by step guidance through the basics of teaching coding.

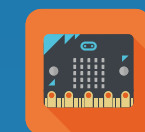

## Lesson Plans

A series of lesson plans to help introduce the coding curriculum to your pupils.

## 'Scratch' import

Import Scratch files that you have made public into 'my files', and add learning conversations to them or embed them in our digital paper, j2create.

## Compatible with BBC Micro:bit

You can use your BBC micro:bit for all sorts of cool creations, from robots to musical instruments – the possibilities are endless.

The BBC Micro:bit has a wide range of features, like 25 red LED lights that can flash messages. There are two programmable buttons that can be used to control games. The BBC Micro:bit can detect motion and tell you which direction you're heading in – clever!

# Promoting parental engagement

A simple way for schools to stay connected with parents and carers. Through the Parent portal, parents/carers are able to view their child's completed work via j2journal, the j2homework activities set for them, j2stars awards, and j2messages received. The Parent portal also allows parents to support their child/ren by uploading their own comments and media.

## Easy setup

The Parent portal is easy to set up, with an automated email invite system. Multiple parents/carers can be linked to individuals and siblings.

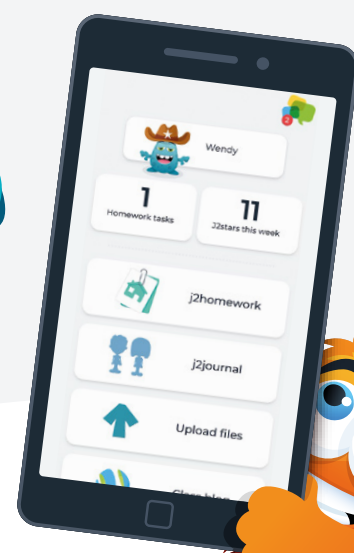

## Staying connected

Any updates a teacher makes to the Parent portal will initiate an email and/or push notification to be sent to the parents of the children involved.

## Safe and secure

All data is secure and compliant with GDPR. Families will only receive news specific to their child/ren's work.

Just2easy j2homework Just2easy j2message Just2easy j2stars Just2easy j2journal

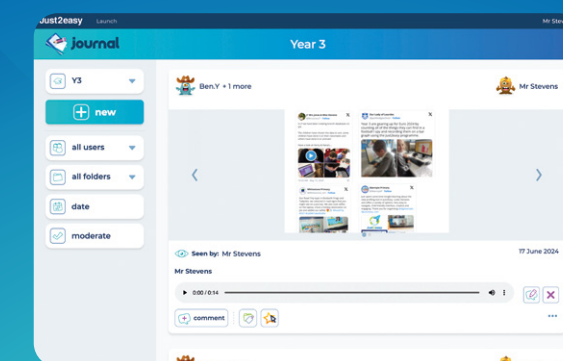

See more

# School and home learning together

J2journal, our latest and most popular tool, allows teachers to create a digital portfolio of their children's learning. These portfolios can be shared with senior leadership and inspectors, but also with parents via the Parent portal, keeping them informed and involved. This flexible tool makes it simple for teachers to gather, organise, and share evidence of learning in one easy-to-manage digital space.

## With j2journal you can:

- Upload a range of file types to create a digital portfolio of learning
- Share the portfolio with parents, who see only their child's work
- Organise work by tagging children and creating folders
- Moderate posts and comments made by parents and children
- Assess work with in-built or uploaded progression frameworks

## Now with new shared journals!

With j2journal, schools can now create a journal that can be safely shared with classes from other schools. Enrich learning and foster collaboration with our shared journals.

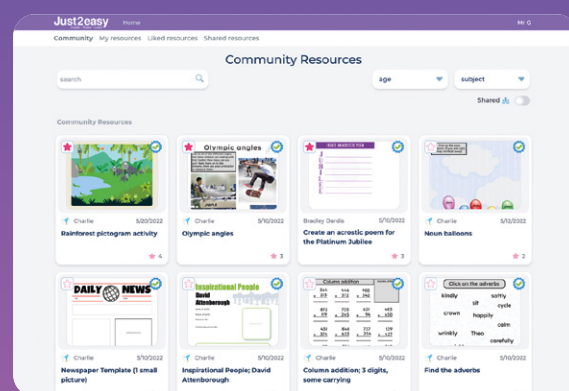

# Browse, use, create, and share inspiring digital resources

Introducing our extensive library of cross-curricular worksheets, interactive lesson activities, games, and more! Quickly and easily find a resource that will wrap effortlessly around the Just2easy Tool Suite.

- Designed by teachers for teachers
- Find what you need in seconds, filter by keywords, age group, subject, language, and more!
- Share with pupils or teachers at the click of a button
- Seamlessly wrap around your lesson plans or set as homework
- Fully editable to fit around your needs
- Downloadable and printable versions available

Find out more

## The power to create and share your own digital worksheets

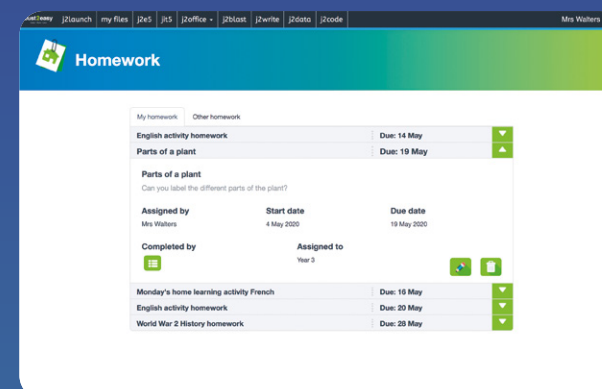

Not only can you utilise our extensive pre-prepared resources, but you can also create your own private library of lesson plans, worksheets, and activities. Created a resource that you think other teachers will love too? Publish it to the community library at the click of a button.

# Set work, engage pupils, save time

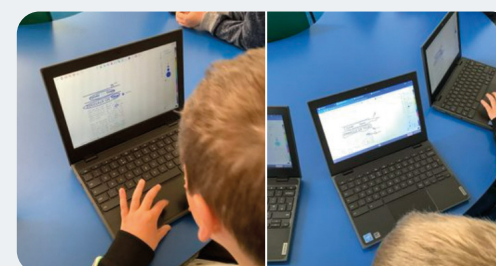

Watch a video

## Assign, track, and assess homework

- Engage pupils with audio, video, or written tasks
- Share files for pupils to see and use instantly
- Manage school-wide pupil workload
- Specify due dates, and schedule homework for later
- See clearly when homework has been completed

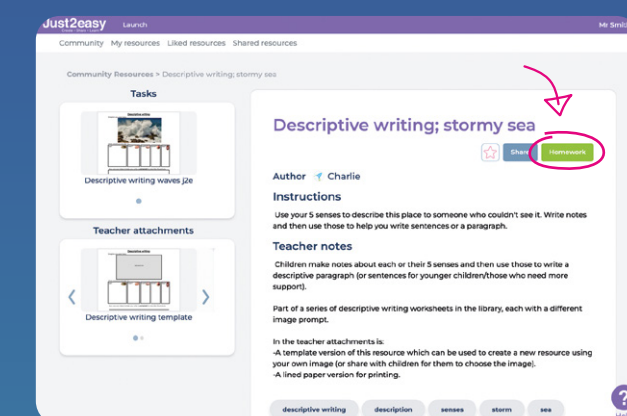

**Miss Jones**  
@MissCJonesTeach - 20 Apr

Another day, another ICT first in Elm class. Using J2homework feature on @just2easy\_com to access a teacher set task to find & highlight features of Newspapers as part of our latest literacy genre. The children continue to amaze me #ambitiouscapable

## Integrated into the Just2easy Library

For even quicker and easier homework planning, j2homework links seamlessly with the Library. Choose one of our ready made resources and set it as homework directly from the Library.

## Involve parents in home learning

J2homework is visible in the Parent portal, notifying parents when a new piece of homework has been set. They have direct access to that activity, allowing them to easily support their child.

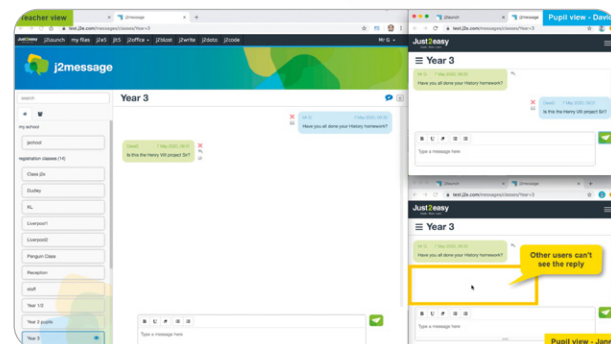

See a demo

## Two-way communication that doesn't fill up your inbox

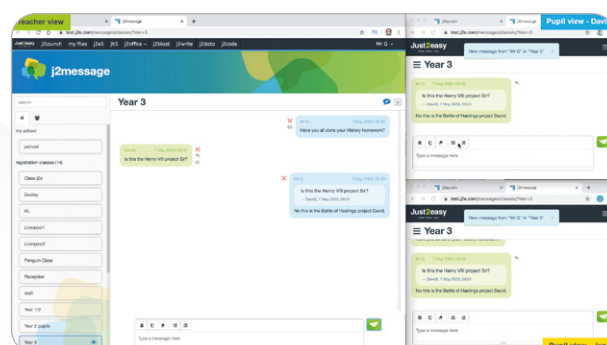

### Instant Messaging

J2message is an instant messaging tool, enabling teachers to communicate with pupils, classes, colleagues, and parents. Great for announcements, class reminders, and supportive feedback.

### Safeguard your class conversations

Safe communication is our priority; providing a safe space for real-time announcements, comments, and discussions. Monitor, moderate, and export any chat from within the safe j2message system. Even deleted messages can be retrieved.

### School in control

Teachers have the power to enable or disable children and parents' messaging ability. J2message can be easily set up to work exactly how your school needs it to.

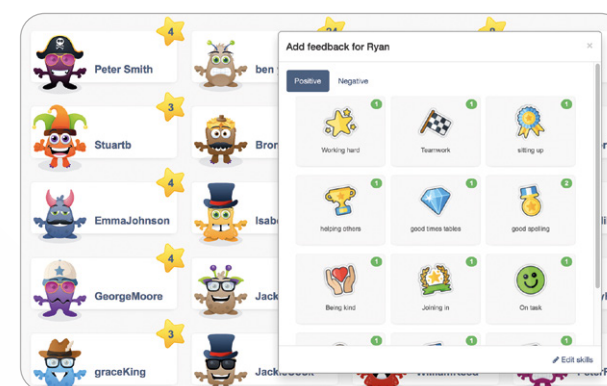

### Home-school communication

Communicate safely and easily with parents who are signed up to the Parent portal. Parents can even receive push notifications for new messages via the Parent portal app.

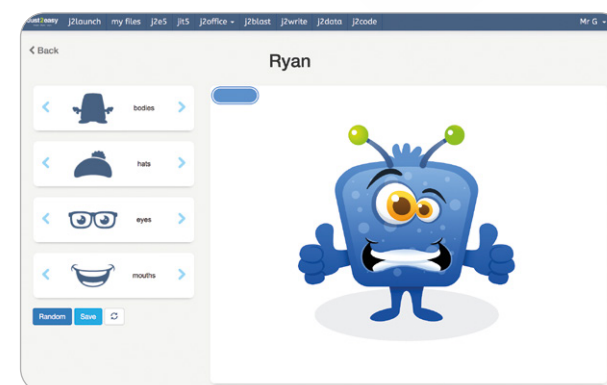

Watch a video

## Motivate pupils by rewarding achievements

### Make rewards relevant and personal

Celebrate every win no matter how big or small. Teachers can create and send personalised rewards to individuals or the whole class.

### Create an avatar and unlock items

Pupils can have fun personalising their avatars. Our avatars support pupils emotional wellbeing with a variety of emotions and expressions to choose from.

### Pembrey Primary

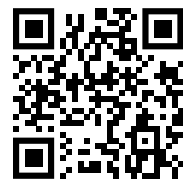

@PembreySchool - 11 June

Congratulations to our year 2 children who have reached 250 j2stars! @just2easy\_com

### Celebrate and share

Through the Parent portal, parents are updated about their children's achievements and milestones in real-time.

# Office apps made for teaching and learning

## Designed for education

With safe image searches, auto save to pupil files, real-time collaboration, and assessment built in, j2office is designed with teachers and pupils in mind.

No more converting and importing files between different programmes or apps. With a pupil-friendly version of Office integrated into the Just2easy platform, teachers and pupils can do it all in one central location.

## Documents in the cloud

Never lose pupils' work, safely store everything in one central location! Create, edit and share documents in the cloud - from any device.

## Compatible with Microsoft and Google

Drag and drop Office and Google files into j2office, then get working on your edits, or share and collaborate with others from any device.

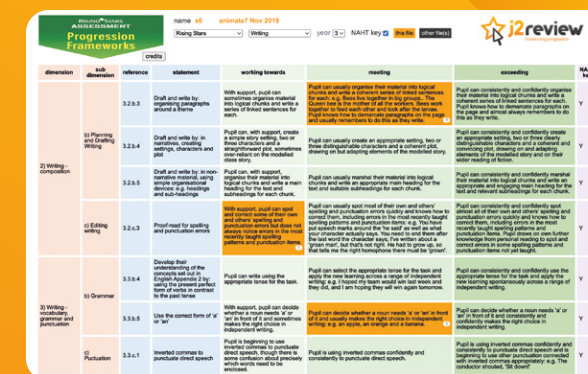

Now built into  
Just2easy

# Evidence, assess, and report

J2review makes formative assessment easy, using any progression framework, and enables teachers to give informative feedback quickly and effectively. Get a real-time progress overview of how much evidence has been collected for each student and which parts of the framework have been covered so that any learning gaps can be quickly identified.

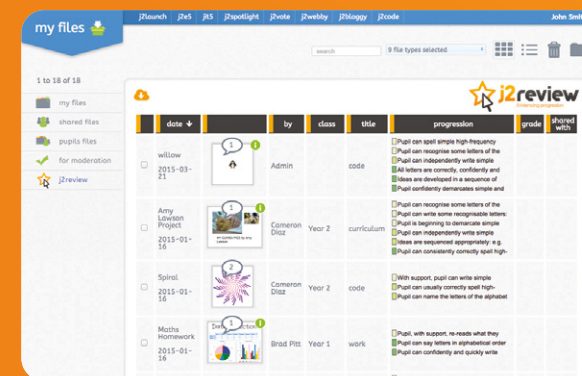

- Evidence pupil progress with:
  - Video
  - Audio
  - Photo
  - Writing
  - Drawing
- Map pupil work to progress frameworks
- Add additional evidence
- Provide feedback in written, oral, or multimedia format

## Map to your school's progression frameworks

J2review is designed to be flexible around every school's needs. Multiple progression frameworks are preloaded into j2review, including Rising Stars, CCEA (for schools in Northern Ireland) and Curriculum for Excellence (for those in Scotland). In addition, schools can upload progression frameworks for their school or even individual students, such as those with additional needs who have their own individual standards and levels.

Tool Suite

## Game-based learning to sharpen times table and spelling knowledge

### Using play to build better outcomes

Pupils can practice multiplication and spelling while they do what comes naturally; play. Within j2blast's fun, games-based learning universe, pupils play against each other or against the computer. Pupils progress through the levels, earn points, and unlock new avatars whilst climbing their way to the top of the class, school, and even world leaderboards.

### Track, reward, and motivate

Nothing beats a personal touch, which is why j2blast enables teachers to interact with the platform to easily track pupil progress, identify learning gaps, and reward star gamers.

## A website building platform that gives children a real purpose for writing

J2bloggy is an e-safe and secure space built on WordPress technology where children can create their own websites. It promotes writing with a purpose, with a real audience, across all areas of the curriculum and beyond.

J2bloggy comes packed with features including ample storage, themes and plugins. It also includes a lite version of our BETT award-winning j2create editor, meaning that children are working with a tool they are already comfortable using.

Tool Suite

## Celebrate children's work by sharing in a safe space

### Bringing WordPress to education

With j2webby, schools have a ready to use website for sharing children's work. Linked to every tool within the Tool Suite, pupils choose their work for publishing and submit it to be moderated by a teacher with just the click of a button. They then have an authentic audience of classmates, parents, teachers, and even (optionally) children around the world and they can receive real peer feedback. All work and comments must be moderated by teachers before they go live, making it completely safe and secure.

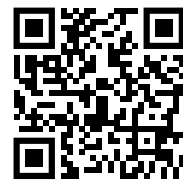

Tool Suite

See a demo

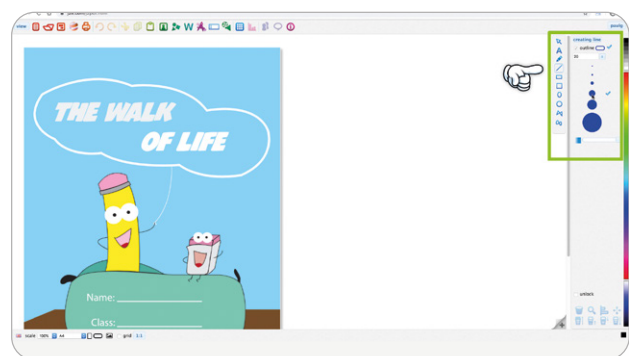

# Annotate, merge, share, and store PDF files

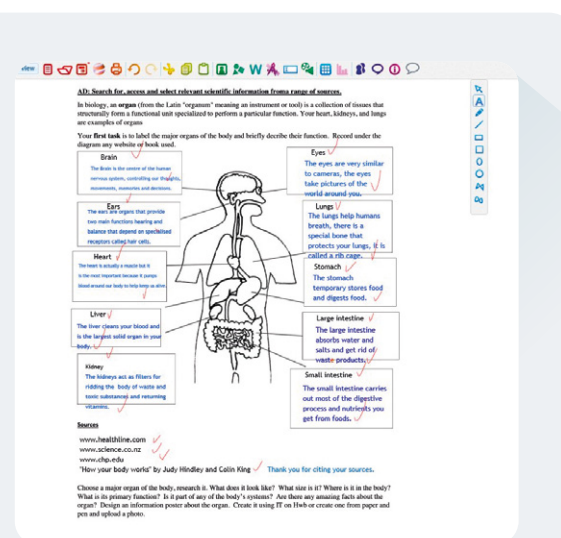

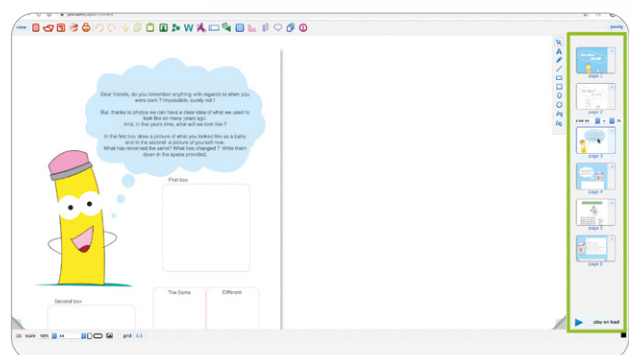

## PDF files in the cloud

Our highly versatile tool enables you to annotate PDFs; add text, graphics, sound, video, and more.

PDF files can then easily be shared in the cloud with your school, class or individual learners, or teachers.

Multiple PDFs can be merged into one document, and pages easily moved, or deleted.

**St Helen's RCP**  
@StHelensRC - 13 Jan

Receiving some good quality Remote learning work from Yr 6. This pupil noted that she had to cite her sources and used J2PDF tools thoughtfully to write the organs and their functions in different colours. Keep it up Lilliana.
